LOOK HERE!

ONE ONLY AT \$26.00 !!

OUR SOLID COMFORT BUCKBOARD.

No more feet paralyzed. Rides as easy as a Buggy.

Look at this: it will pay you. One Buckboard for \$26.00.

For the purpose of getting this thoroughly introduced in your State and obtaining an active Agent in several places,

And to avoid the enormous expense of sending our traveler there, we have decided to offer a sample Wagon at manufacturer's cost, believing that thereby we will be able to work up a big trade on it and secure many future orders. We will make a sample Buckboard for cash for \$26, with the understanding that this price shall not govern future shipments, but on receipt of the sample, if you decide to take the agency for that place, we will make you our lowest wholesale prices. We make a specialty of this wagon, and in addition a full line of Buggies, Surreys and Spring Wagons, and also make a specialty of hand-made Harness. In ordering, parties can send draft with order, or, if they prefer, we will ship the Wagon and draw with B. L. attached. In ordering, name width of track, otherwise we ship 4 ft. 8 in. track. Please give us your order and we will make you some money.

IMPORTANT.

Heretofore there has been some objection to Buckboards, for the reason that the body being fastened to the bolster plate in front would give no spring to it, consequently there would be a disagreeable and almost paralyzing jar to the feet of those riding in them. Realizing the necessity for a change in this particular, as in many others, we have put upon the market the "SOLID COMFORT" which is so constructed that two oil-tempered springs run from the bolster up under the body to take off this jar which, with two Elliptic springs under the seat and the spring of the body, makes it one of the nicest riding wagons ever put upon the market. It has double collar steel axles, steel tire, good seasoned second growth hickory wheel, full leather dash, leather bound, and our patent circle plate which avoids putting any hole through the bed and axle, thereby giving the axle its entire strength. It has also steel spring risers, doing away with the wooden risers which so often check and split, and bring the bearings out further from the center of the body. Shafts are well trimmed with patent leather.

We make these both in single and double seats, paint them either wine or vermilion. Two seats cost \$6.00 more. Don't fail to state width of track.
